## Emergency Hospital Bed Frame

Product: HB001

The emergency hospital bed frame was designed in response to the COVID-19 pandemic and built to address the threat of hospital bed shortages. These bed frames are constructed out of Melamine Laminate Surfaces, an ideal substrate that can be easily cleaned and disinfected.

The dimensions of the bed are a key feature. The frame is sized and built to fit through non-standard patient room doors without the need to disassemble.

The 5 inch clearance allows lift access under the bed for the lift machine.

For size specifications to accommodate additional mattress sizes or other client requirements (at no charge) please contact:
